

Features Requested

The following is a tabulation of new features for future release(s) requested by the i2b2 community (via either this wiki, or email postings to the i2b2AUG forum):

| # | Description of Feature | Requested by | Ver. Imp'd |
|---|---|---|------------|
| 1 | <i>"Any possibility of a future ExportXLS release that will list all occurrences of a concept for a patient, rather than just the first occurrence that is retrieved?"</i> | Jack London (Kimmel Cancer Center) | 3.0 |
| 2 | An updated <i>SaveToExcel.php</i> file that prevents potential blank exported <i>.XLS</i> files (without requiring the deployers to update their <i>php.ini</i> files). | Gregory Schulte (Children's Hospital Colorado) | |
| 3 | Add user option to select from the following when listing concepts: * first occurrence * last occurrence * all occurrences NOTE: this feature is complimentary to feature 1. | Wayne Chan (University of Massachusetts Medical School) | (3.0) |
| 4 | Add user option to select displaying contents (from the following) when listing concepts: * from "tval_char", or "nval_num" (if former is blank), or "concept_cd" (if prev 2 are blank) * from "concept_cd" NOTE: this feature is complimentary to features 3 & 1. | Wayne Chan (University of Massachusetts Medical School) | 3.0 |

We'll try to get to all of these requests as soon as possible, depending on our bandwidth. We may however get to certain features before others, if those should be more attainable than the rest.

Please don't hesitate to contact us concerning any questions or problems. Thanks.
