Workbench Release Documentation

The Workbench Release Documentation pages contain the Release Notes for the i2b2 Workbench Software. Prior to version 2.0.01, the i2b2 Workbench was released as part of the standard i2b2 software. Therefore the documentation for those earlier releases can be found in the standard i2b2 Release Documentation space. Starting with version 2.0.01 and all future i2b2 Workbench releases will be documented within this space.
