Proposed Meeting Topics

Below is a list of proposed topics for future meetings of the User Interface Working Group. The initial list was developed at the Working Group's meeting at the annual i2b2-tranSMART conference in June 2018.

- **Low hanging fruit**
    - Collect info on UI bugs (e.g., i2b2 timeline issues)
    - Are there minor tweaks that can improve usability?
    - Can SHRINE feature be added to the standard i2b2 web client?
    - Understand ongoing UI efforts (e.g., DFCI's UI)
- **Building queries**
    - Modifiers
    - Temporal queries
    - Family relations
    - Query for specimens and other entity types (instead of patients)
- **Data quality and data insights**
    - Health services and healthcare utilization (e.g., fact count) query concepts
    - Info about ontology items (e.g., data quality, counts by year, etc.)
    - Timelines for data insights and population synopsis
    - Consortium quality measures (federated queries)
- **General functionality**
    - Methods of login, such as keycloak ID management platform
    - Localization (different languages)
    - Are new APIs needed for new UI features?
