Import Browser

The **Import Browser** serves multiple purposes ([see more detailed page](#)):

1. Add i2b2 servers (localhost in this example).
2. Add datasource servers for import.
3. Quick overview about your i2b2 servers.
4. Quick overview about the i2b2 projects (i2b2idrt-demodataproject, ...).
5. Quick overview about your datasource servers.
6. Starting point for your [data import](#).
7. Progress bar and log.

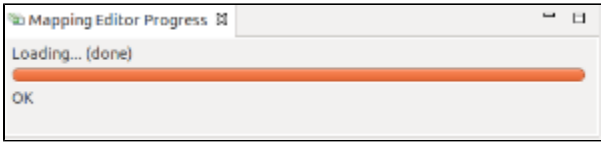

Mapping Editor

With the **Mapping Editor** you can ([see more detailed page](#)):

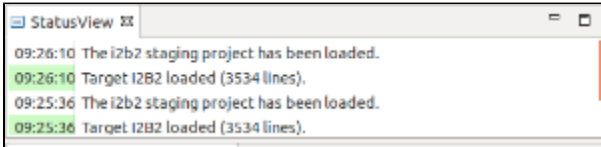

1. Load an existing i2b2 ontology (left hand ontology in the picture).
2. Generate a new i2b2 ontology (from scratch or from an existing one, this is the ontology on the right hand side in the picture).
3. Map items onto each other.
4. Create, read, update and delete items and folder.
5. Add a start- and end dates.
6. Merge items and folder with medical [standard terminologies](#).
7. Upload the mapped data into a new or existing i2b2 project.

Mapping Editor Progress

The **Mapping Editor Progress** view gives you the progress of every action done within the Mapping Editor.

Status View

The **Status View** gives you the status of every action done within the Mapping Editor.

Staging Info View

Attribute	Value
C_HLEVEL	7
C_FULLNAME	/i2b2stg/CD-10GMF
C_NAME	CD-10GMF (CD-10 GMF)
C_STUDYCD	10
C_STUDYATTRIBUTES	10
C_TOTALN	3
C_BASECODE	
C_METADATAURL	cdscript.cd
C_FACTTABLECOLUMN	cdscript.cd

Within the **Staging Info View** you can see detailed information about an item or a folder of an existing i2b2 ontology that you previously loaded into the Mapping Editor. This are all items and folders on the left hand side of the Mapping Editor.

Target Info View

Attribute	Value	
C_NAME		✖
C_TOOLTIP		✖
C_COMMENT		✖
C_METADATAURL		✖
C_STUDYCD		✖
