

Message Explanations

This section defines the message elements in the CRC namespace (<http://www.i2b2.org/xsd/cell/crc/psm/1.1/> and <http://www.i2b2.org/xsd/cell/crc/pdo/1.1/>). Each element defined will have an implied prefix of **crc:** unless another namespace is explicitly stated. Elements from other namespaces that are included within the CRC elements will be listed but not expanded or defined in this document. Please refer to the documents for the other cells to get specific details on those elements.
