getServices - DeleteCell Request Message

```
<message_body>
<pm:delete_cell id="ONT">
<project_path></project_path>
</pm:delete_cell>
</message_body>
```

A **deleteCell** message is sent by a client application or another cell service to delete a cell from the PM cell.
The domain, username, and password are sent in the header of the message so it does not need to be sent separately in the *<message_body>*.
