

# getServices - GetCell Request Message

```
<message_body>  
<pm:cell_data id="ONT">  
<project_path></project_path>  
</pm:cell_data>  
</message_body>
```

A **getCell** message is sent by a client application or another cell service to get a cell in the PM cell.  
The domain, username, and password are sent in the header of the message so it does not need to be sent separately in the *<message\_body>*.
