

# get\_folder\_by\_project

A **get\_folder\_by\_project** message returns a list of folders that will be displayed as roots of the Workplace tree. No other information needs to be passed to the service.  
User information is provided in the *<message\_header>*; roles will be provided by the **Project Management (PM) cell**.

## Get a List of Folders Associated with a Project

The **get\_folder\_by\_project** message is sent by the workplace view to populate the root nodes of all users in a project. This feature is accessible by users with the role of *MANAGER*.  
The sequence of events is as follows (assumes max is not an issue)

1. The client requests a list of categories for a given user (get\_folder\_by\_project)

Request type = core

1. The WORK server performs the following steps:
  - a. Get a list of roles available for this user from the PM cell (this also serves to validate the user)
  - b. Query the WORKPLACE\_ACCESS table for the list of folders associated with this project.

1. The client maps the list of folders to the Workplace root node.

## GET\_folder\_by\_project Request Message

```
<message_body>  
<work:get_folders_by_project type="core"/>  
</message_body>
```

### Possible "type" Settings

Value	Description
core	Return all data except system / date information

## GET\_folder\_by\_userid Response Message

***Response Message:***

```
<folders>
<folder>
