

Uses Style1

The Uses style shows the relationship between modules and sub-modules. This view is very helpful for implementing, integrating and testing the system.

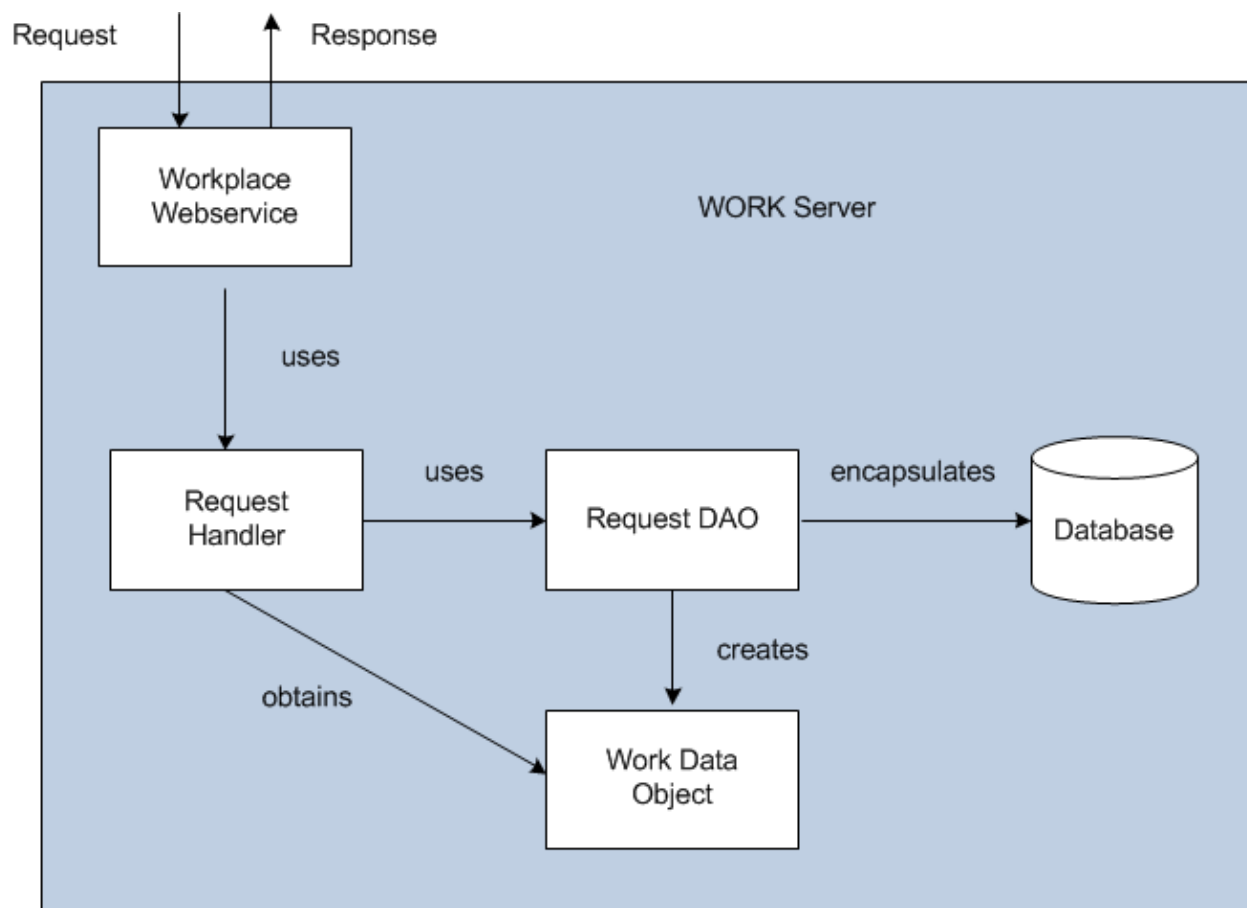

Primary Presentation

System	Segment
Workplace Framework Server	WORK Module
Operation Manager Subsystem	Workplace Webservice Request Handler Request DAO Work Data Object

Element Catalog

Element Name	Type	Description
WORK Module	Module	Authenticates the user through the PM Server System.
Workplace Webservice	Communication Module	Provides web service interface to workplace operations.
Request Handler	Business Object	Delegates workplace requests to Data Access Object layer to perform database operations.
Request DAO	Data Access Object	Supports database query operations.
Work Data Object	Transfer Object	Object representation of persisted data.
