

## C\_SYNONYM\_CD

The `_C_SYNONYM_CD_` is a Boolean field that indicates whether the item is a synonym for another term or not. A "Y" in this field denotes that the field is a synonym, while a "N" means this is the original term.

The default value is "N" so all terms start out with "N" and if a synonym is added it gets the value of "Y".

Two or more synonyms of each other will have the same `_C_BASECODE_` (defined below).
