

M_APPLIED_PATH

Introduced in 1.6 to support modifier term within the metadata table, the `_M_APPLIED_PATH_` is the `CONCEPT_PATH` that the term applies to. Traditional (non-modifier) concept terms have a `M_APPLIED_PATH` of '@'.

An `M_APPLIED_PATH` of 'Diagnoses\Circulatory system%' means that the term is a modifier that applies to the term(s) with `C_FULLNAME` of 'Diagnoses\Circulatory system\' and all its descendants, whereas a `M_APPLIED_PATH` of 'Diagnoses\Circulatory system\' applies to the term with `C_FULLNAME` of 'Diagnoses\Circulatory system\' only.
