PM_CODE_LOOKUP Table

- Any of the "*CD" columns have descriptions available in the _PM_CODE_LOOKUP* table.
- This table is available for client applications to obtain the list of codes that may be entered by the user for the column of a specific table.
- The **NAME_CHAR** has the descriptive name of the code.
- The **LOOKUP_KEYS_CHAR** is a string with a *bar-type-delimiter* that allows strings to be used to lookup subsets of codes.
- An @ in the *TABLE_CD* or the *COLUMN_CD* columns for a specific code is similar to a wild card character and implies that the code can be used in any column with a similar name in any table or any column in the table.
