

Stored XML

Plug-ins developed for i2b2 must send XML formatted strings as drag / drop messages between plug-ins. The XML content stored by the workplace consists of any XML contents inside of a `<plugin_drag_drop>` tag. The namespace for the schema that defines the plugin_drag_drop XML is <http://www.i2b2.org/xsd/hive/plugin/>

```
<i2b2:plugin_drag_drop>  
<!-- any xml content -->  
</i2b2:plugin_drag_drop>
```

The various XML content message formats and their drag source are described throughout the specification.
