

Use Case 4__patient_ without a HIVE number

If the <patient_id> source and value are already mapped to a PATIENT_NUM, then the update date should be compared to the existing record's update date. If the new record has a more recent date, then update the current patient record with this data.

Example:

```
<patient update_date="2006-05-04 18:13:51.00">  
<patient_map_id source="MGH">123</patient_map_id>  
</patient>
```
