

Features

SHRINE to i2b2 Connector Plug-in

This plugin displays all flagged SHRINE queries executed on the ACT SHRINE network from inside the local ACT i2b2 webclient. Users can view any of the SHRINE queries and run them in their local i2b2.

Patient Set Viewer Plug-in

This plugin allows users to review and select subjects for clinical trials. Users can download a de-identified patient data from this plug-in.

Patient List Exporter Plug-in

This plugin allows users to download patient identifiers, either from a workplace folder or from a previous query.
