Chapter 2. Requirements

Software and System Requirements

The i2b2 has a number of software and system requirements which have been outlined in this chapter for you to review. Some of the requirements involve the installation of additional software from various third parties and when appropriate we have outlined the steps to install and configure it to work in your i2b2 environment.

Important Warning for Linux Users

SELinux (Security-Enhanced Linux) is a security module that is delivered with the operating system. The default setting for this feature is set to the highest level (strictest) of security. A number of i2b2 users have encountered various connection issues when this feature is turned on. Therefore, in order to avoid issues with your i2b2 installation, we recommend you disable the SELinux feature.

Chapter 2. Table of Contents

2.1 Chapter Overview
2.2 Database Requirements
2.3 Browser Requirements
2.4 i2b2 Server Requirements
  2.4.1 Java JDK
  2.4.2 Wildfly Application Server
    - 2.4.2.1 Recommended Ports
    - 2.4.2.2 Wildfly Logging Configuration
    - 2.4.2.3 Run Wildfly as a Linux Service
    - 2.4.2.4 Run Wildfly as a Windows Service
  2.4.3 Apache Ant
  2.4.4 Apache Axis2
  2.4.5 System Environment Variables
    - 2.4.5.1 Set Variables on Linux Machine
    - 2.4.5.2 Set Variables on Windows Machine
2.5 Web Server Requirements
  2.5.1 Client URL Request Library (cURL)
  2.5.2 Internet Information Services (IIS)
    - 2.5.2.1 Verify IIS 7.0 Installation
  2.5.3 PHP
    - 2.5.3.1 PHP for Linux
    - 2.5.3.2 PHP for Windows
2.6 i2b2 Requirements
  2.6.2 Download i2b2 Software
2.7 Next Steps
