

# Use Case 2\_ Patient id, num and map\_ids are not mapped

In this case, the <patient\_id> source and value ('EMPI' / 1000000) is already mapped to a PATIENT\_NUM, but the <patient\_map\_id>s are not, so use that PATIENT\_NUM for any of the <patient\_map\_id>s that are not already mapped.

**Example:**

```
<pid>
<patient_id source="EMPI">1000000</patient_id>
<patient_map_id source="MGH">123</patient_map_id>
<patient_map_id source="BWH">777</patient_map_id>
</pid>
```

The rows in the PATIENT\_MAPPING table **before** the update:

PATIENT_IDE	PATIENT_IDE_SOURCE	PATIENT_NUM	PATIENT_IDE_STATUS
1000000	EMPI	528	A
528	HIVE	528	A

The rows in the PATIENT\_MAPPING table **after** the update:

PATIENT_IDE	PATIENT_IDE_SOURCE	PATIENT_NUM	PATIENT_IDE_STATUS
1000000	EMPI	528	A
528	HIVE	528	A
123	MGH	528	A
777	BWH	528	A
