

# Use Case 1\_ Create new entry if PID not found

*(<pid> not found, generate [max+1])*

If the <patient\_id> source / value pair has not been added to the mapping table, a new PATIENT\_NUM with value max(patient\_num)+1 should be generated and all the PATIENT\_NUMs for this patient will receive this value. The new patient number must also be added to the PATIENT\_DIMENSION table.

**Example:**

New <patient\_id> source / value pair = 'EMPI' / 1000000

Select max(patient\_num) from patient\_mapping = 527

New patient\_num = max(patient\_num) + 1 = 528
