

# i2b2\_response.xsd

This schema defines the type for the top-level *<response>* tag and the *<response\_header>* tag. It is used for validating i2b2 response messages.

- **Additional Resources**

Additional details about the *<request>*, *<response>*, *<message\_header>*, *<request\_header>*, and *<response\_header>* tags can be found in a separate document describing the generic i2b2 message. The remainder of this document describes the contents of the *<message\_body>* for the Ontology Management (ONT) Cell.
