

## 6.3.1 Hive Data

The **Hive Data** page captures the following general information about a hive.

Field	Description	Required
Domain Id	<ul style="list-style-type: none"><li>• A unique id for the domain in which this hive resides.</li><li>• This ID is encrypted when it is saved and stored in the database.</li></ul>	Yes
Help URL	<ul style="list-style-type: none"><li>• A link to an external website that may contain additional information on using the i2b2 in your environment.</li><li>• This link is only used in the i2b2 Workbench and is not available from within the i2b2 Webclient. <i>(in the workbench heading there is a button labeled <b>i2b2</b>; clicking on this button will launch the website entered at this field.)</i></li></ul>	No
Domain Name	<ul style="list-style-type: none"><li>• The name of the domain in which this hive resides.</li><li>• This is the same name that is entered in your Web Client and Admin config files as well as the Workbench properties file.</li></ul>	Yes
Environment	<ul style="list-style-type: none"><li>• The type of environment this hive resides. The options are:<ul style="list-style-type: none"><li>• Development</li><li>• Production</li><li>• Test</li></ul></li></ul>	Yes

### Note

The hive is created when you are installing the i2b2 server. You cannot add or remove a hive from within i2b2 Admin; however you can edit the hive's data.
