## i2b2-based Registries

This is the home of the Related Project - i2b2-based Registries space.

The Cincinnati Children's Hospital Medical Center (CCHMC) i2b2 team has extended i2b2 to create an enhanced patient registry and an associated web-based toolkit. It provides the necessary functionality in a modular fashion, allowing users to choose the capabilities that are appropriate for their project. The enhanced registry architecture includes linkage to the EHR and an application layer that allows the development of functionality to support quality improvement and comparative effectiveness research. There are capabilities for data collection to capture information that is not collected in an EHR, as well as mechanisms for reporting and visualization.

Versions of the CCHMC i2b2 code and data documents can be found at the CCHMC SVN: <https://bmi.cchmc.org/svn/i2b2/i2b2/public/>

### Example Project: Liver Transplant Registry

Within CCHMC's i2b2 based Liver Transplant Registry users can:

1. **View/Edit EHR data:** Specific EHR fields are identified, mapped to i2b2, and displayed in either a read only, or editable format. Any changes are tracked through an audit trail and users are alerted through a color coding system if a new/different value is available to pull from the EHR.
2. **Perform Data Entry:** Through the use of forms users can add additional data to the i2b2 database.
3. **Run Pre-defined Reports:** Numerous pre-defined reports have been developed for users to run as needed.

### View/Edit EHR Data: Patient Information

The screenshot displays the i2b2 Workbench interface for the Liver Registry. The top navigation bar includes the CCHMC logo, the text "i2B2 Workbench Cincinnati Children's Research Foundation", the project name "Project: Liver QA/Test Environment", and a user welcome message with a "(Logout)" link. A secondary navigation bar contains links for "Home", "Find Patients", "Chart Review", "Data Entry", "Analysis", "Import/Export", and "Feedback".

The main interface features a "Data Entry" tab and an "Add Patient" button. Below this is a "Choose Study:" dropdown menu set to "Liver Registry", along with "Change Patient" and "Switch to 'View' mode" buttons. A patient information summary row shows fields for Name, Alias, MRN, i2b2 ID, and DOB, all with redacted values.

The central section is titled "Liver Registry" and includes a "Data Last Refreshed: 02/27/2011" and "Patient Last Updated: 03/03/2011, by [redacted]" status. Below this are tabs for "Patient Info", "Clinical Info", and "Research". The "Patient Information" tab is active, showing a "Save" button and a list of fields for "Patient Demographics": MRN, First Name, Middle Name, Last Name, Alias, and DOB. Each field has a redacted value and a red "E" icon, indicating that the data is available for editing from the EHR.

At the bottom of the page, there is a copyright notice: "©2003-2010, Cincinnati Children's Hospital Medical Center CCHMC | i2b2admin".

### Liver Age at Transplant Report

Last Run on 03/29/2011 15:16:41

**Age at Transplant (Last 25 Transplants)**

Measure	Calculation
Age at Transplant - Median	3 Years
Age at Transplant - Mean	5 Years
Age at Transplant - Minimum	0 Days
Age at Transplant - Maximum	21 Years
Number of Patients less than or equal to 1 year of age	9
Number of Patients greater than 1 year of age	16
Number of Patients greater than or equal to 18 years of age	1
Percentage of Patients less than or equal to 1 year of age	36.00%
Percentage of Patients greater than 1 year of age	64.00%
Percentage of Patients greater than or equal to 18 years of age	4.00%

**Age at Transplant (Patient Specific)**

Date of Transplant					
Last Name	First Name	MRN	DOB	Ethnicity	Gender
	ABO	Transplant Number	Age at Transplant
