

Optional _metadataxml_ content

Currently this tag is used for concepts of a laboratory nature [LAB] or concepts related to NLP [KEY]

<ac:structured-macro ac:name="unmigrated-wiki-markup" ac:schema-version="1" ac:macro-id="93c535c2-8b0c-491c-acf2-8c60e8667439"><ac:plain-text-body><![CDATA[<ValueMetadata>	Container for information associated with a laboratory value [LAB] or NLP-related keyword [KEY]]]></ac:plain-text-body></ac:structured-macro>
<Version>	The version associated with this data		
<CreationDateTime>	The timestamp associated with this data		
<DataType>	<p>Identifies the data type. Possible values are: For numeric values the datatypes are: PosFloat, Float, PosInteger, Integer</p> <p>For pre-determined text values the datatypes are: Enum</p> <p>For free form text values the datatypes are: String, largestring</p>		
<Flagstouse>	Represents the type of flag to use. Examples values: HL = High / Low (does not apply to String types) A = Abnormal		
<Oktousevalues>	Indicates if it OK to use values Y indicates the value is a number (numeric types) N or empty indicates the value is not a number		
<MaxStringLength>	The maximum length associated with a String data type		
<ul style="list-style-type: none"> • Note The next six tags apply to numeric types. 			
<LowofLowValue>	Values less than this are categorized as <i>Very Low</i> .		
<HighofLowValue>	Values between this and low are categorized as <i>Low</i> .		
<LowofHighValue>	Values between this and high of low are categorized as <i>Medium</i> .		
<HighofHighValue>	Values between this and low of high are categorized as <i>High</i> . Values greater than this are categorized as <i>Very High</i> .		
<LowofToxicValue>	The low end of the toxic value range		
<HighofToxicValue>	The high end of the toxic value range		
<ul style="list-style-type: none"> • Note The container applies to Enum types. 			
<EnumValues>	Container of values associated with the enum data type		
<Val description>	Enum data type value		
<ul style="list-style-type: none"> • Note This container applies to any type associated with a unit of measurement 			

<UnitValues>	Container for the unit of measurement value information
<NormalUnits>	The unit of measurement associated with the value.
<EqualUnits>	An equivalent unit of measurement associated with the value.
<ConvertingUnits>	Container for unit conversion information
<Units>	Conversion unit of measurement
<MultiplyingFactor>	Conversion unit multiplication fact.
