

3.10 Next Steps

Steps Completed

The following steps were completed during this chapter on the data installation process.

Data Installation Chapter

- Extracted the i2b2 data package
- Created database user accounts for i2b2 schemas
- Created the tables and loaded the data for the following:
 - Crcdata
 - Hivedata
 - Imdata
 - Metadata
 - Pmdata
 - Workdata

Next Steps

After completing this chapter on Data Installation you are now ready to begin installing the i2b2 server as described in [Server Install](#) section

If you are building [build i2b2 from source code](#), before you can install any cells you need to first install the i2b2 Server-Common. The procedures for this step are outlined in the **i2b2 Server-Common Install chapter**.
