4.2.2 Directory Structure and Working Directory

Once you have extracted the i2b2 core source code you will notice the main directory structure in your i2b2 source directory

Main Directory for New Data Installs: *YOUR_I2B2_SRC_DIR*

Directory	Description
admin	Contains the source code for the Admin module used by the PM Cell.
edu.harvard.i2b2.crc	Contains the source code for the Data Repository (CRC) cell.
edu.harvard.i2b2.fr	Contains the source code for the File Repository (FR) cell.
edu.harvard.i2b2.im	Contains the source code for the Identity Management (IM) cell.
edu.harvard.i2b2.ontology	Contains the source code for the Ontology (ONT) cell.
edu.harvard.i2b2.pm	Contains the source code for the Project Management (PM) cell.
edu.harvard.i2b2.server-common	Contains the source code for the common server code used by the i2b2 core cells.
edu.harvard.i2b2.workplace	Contains the source code for the Workplace Framework (WORK) cell.
edu.harvard.i2b2.xml	Contains the xsd files used by the i2b2 server and clients.

Working Directory

In this step of the installation process we will be working with the **edu.harvard.i2b2.server-common** directory. Within this directory is the **build.properties** file that will be edited with the necessary information to build and deploy the common server code.
