

1.3 Install Web Client on Web Server

Copy Web Client Files to your Web Server Directory

At this point in the installation we need to copy the i2b2 Web Client directory from *YOUR_I2B2_WC_DIR* to your web server directory.

Steps to copy files

1. Go to the location of *YOUR_I2B2_WC_DIR*.
2. Locate the folder called **webclient**.
3. Copy the entire **webclient** folder to your *web server directory*.

Linux: On a Linux server you want to copy it to your *httpd directory*.

Example: */var/www/html*

Windows: On windows server you want to copy it to your *wwwroot directory* which is in your inetpub folder.

Example: *C:\inetpub\wwwroot*
