

6.3 Managing i2b2 Hive Data

The i2b2 hive and associated web services are the infrastructure used to integrate a collection of cells. The management of your Hive data is done in the i2b2 Administration Module within **Manage Hive**. The following functions for managing the hive are available.

1. Edit hive data (*Domain ID, Help URL, Domain Name, and Environment*)
2. Add, edit, and delete hive (*global*) parameter(s)

The steps on how to use these features are defined in the sections that follow.
