## 6.3 Managing i2b2 Hive Data

The i2b2 hive and associated web services are the infrastructure used to integrate a collection of cells. The management of your Hive data is done in the i2b2 Administration Module within Manage Hive. The following functions for managing the hive are available.

- Edit hive data (Domain ID, Help URL, Domain Name, and Environment)
  Add, edit, and delete hive (global) parameter(s)

The steps on how to use these features are defined in the sections that follow.
