

C_FULLNAME

The `_C_FULLNAME_` is the hierarchical path that leads to the term. Below is an example of the `_C_FULLNAME_` for the term "Rheumatoid arthritis". It is shown on several lines but is actually one concatenated line in the `_C_FULLNAME_` column. Each back slash () represents another hierarchical level.

i2b2

\Diagnoses

\Musculoskeletal and connective tissue (710-739)

\Arthropathies (710-719)

\(714) Rheumatoid arthritis and other arthropathies

\(714-0) Rheumatoid arthritis\

c_fullname must include a trailing backslash!

Each element of the path is separated by a backslash. Every element of the path must include a backslash, and there **must be a trailing backslash** at the end.
