## 1.3 Install Web Client on Web Server

## Copy Web Client Files to your Web Server Directory

At this point in the installation we need to copy the i2b2 Web Client directory from YOUR\_I2B2\_WC\_DIR to your web server directory.

## Steps to copy files

- 1. Go to the location of YOUR\_I2B2\_WC\_DIR.
- 2. Locate the folder called webclient.
- 3. Copy the entire webclient folder to your web server directory.

Linux: On a Linux server you want to copy it to your httpd directory.

Example: /var/www/html

Windows: On windows server you want to copy it to your wwwroot directory which is in your inetpub folder.

Example: C:\inetpub\www.root
