

## 4.2.2 Directory Structure and Working Directory

Once you have extracted the i2b2 core source code you will notice the main directory structure in your i2b2 source directory

**Main Directory for New Data Installs:** *YOUR\_I2B2\_SRC\_DIR*

| Directory                      | Description  |
|--------------------------------|--|
| admin                          | Contains the source code for the Admin module used by the PM Cell.               |
| edu.harvard.i2b2.crc           | Contains the source code for the Data Repository (CRC) cell.                     |
| edu.harvard.i2b2.fr            | Contains the source code for the File Repository (FR) cell.                      |
| edu.harvard.i2b2.im            | Contains the source code for the Identity Management (IM) cell.                  |
| edu.harvard.i2b2.ontology      | Contains the source code for the Ontology (ONT) cell.                            |
| edu.harvard.i2b2.pm            | Contains the source code for the Project Management (PM) cell.                   |
| edu.harvard.i2b2.server-common | Contains the source code for the common server code used by the i2b2 core cells. |
| edu.harvard.i2b2.workplace     | Contains the source code for the Workplace Framework (WORK) cell.                |
| edu.harvard.i2b2.xml           | Contains the xsd files used by the i2b2 server and clients.                      |

### Working Directory

In this step of the installation process we will be working with the **edu.harvard.i2b2.server-common** directory. Within this directory is the **build.properties** file that will be edited with the necessary information to build and deploy the common server code.
