Educational Seminars

i2b2 Educational Sessions

The **i2b2 Education Seminars** are designed for members of the i2b2 Community to connect and share information about their work to other members of the community. These seminars also provide members of the i2b2 Community a forum to learn more about each other, how they utilize the i2b2 and to initiate collaborative projects.

Note
Please contact Diane Keogh or Janice Donahoe if you would like to present your work or have an idea for a future topic.
