## Release Summary

The current version of the i2b2 Workbench software that has been released is 2.0.01. This release includes some improvements and fixes many issues, the most significant one being a problem with the i2b2 Workbench not running on newer apple machines. Since the problem is with a third-party software and out of the hands of the i2b2 community we have decided to create two new virtual machines (VM) that mac users can download and use in their environment.

- The first VM (i2b2WB-VM-lin-mac-2001) contains the i2b2 Workbench application and can be used by i2b2 users who want to run the i2b2 Workbench in Linux machine VM on a mac (or any other machine with VirtualBox).
- The second VM (i2b2WB-VM-lin-src-2001) contains the source code for the i2b2 Workbench, Eclipse Neon, and the i2b2 Workbench application. It can be used by developers who want to access & run the source code in a Linux environment.

Some other improvements include updating the i2b2 Workbench to run on a newer version of Eclipse (Neon) and using JAR files to add new plugins to your i2b2 Workbench. Several improvements were also made to the Timeline view and are included in this release.

- Improvements to the pop-ups that display when hovering over a tic in the timeline view. Can see a traversal list of all observations and the ability to click on an observation to see the details.
- New 'already-read' and 'starring' markings to indicate which observations have been read or starred by you.
- Advanced text searches are improved in Note viewer

## Download Software Files

There are basically three categories of software files that can be downloaded for the i2b2 Workbench:

1. Client Desktop Application
2. Source Code
3. VMs

The download files associated to each of these categories can be found below.

### Client Desktop Application - applicable only for Windows

Description	Software Version	Download Link	Additional Documentation
i2b2 Workbench for Windows	2.0.01	 <a href="#">i2b2WB-win-2001.zip</a>	
i2b2 Workbench for Mac			<b>** This is now part of the i2b2 Workbench VMs</b>

### Source Code

Description	Software Version	Download Link	Additional Documentation
i2b2 Workbench Source	2.0.01	 <a href="#">i2b2WB-src-2001.zip</a>	

### Workbench VMs (VirtualBox- applicable only for Unix)

Description	Software Version	Included on VM	Download Link	Additional Documentation
Unix VM of the i2b2 Workbench (user version)	2.0.01	<ul style="list-style-type: none"> <li>i2b2 Workbench application (mac)</li> </ul>	 <a href="#">i2b2WB-VM-lin-mac-2001.zip</a>	

Unix VM of the i2b2 Workbench (developer version)	2.0.01	<ul style="list-style-type: none"><li>• i2b2 Workbench application (mac)</li><li>• i2b2 Workbench source code</li><li>• Eclipse Neon</li></ul>	 <a href="#">i2b2WB-VM-lin-src-2001.zip</a>
