i2b2 Working Groups Home

i2b2 tranSMART Working Groups

Members of the i2b2 tranSMART Community have organized various working groups on several topics of interest. These working groups of the i2b2 tranSMART Foundation are one of the key ways for the community, members, and partners to interact and help improve the Foundation and its products.

- ETL Working Group
- Ontology Working Group
- User Interfaces Working Group

In addition to the working groups, the i2b2 tranSMART Foundation hosts a monthly Community Meeting on the third Tuesday of the month at 11:00am. See more on the Foundation's Events Calendar.
