i2b2-based Registries

This is the home of the Related Project - i2b2-based Registries space.

The Cincinnati Children's Hospital Medical Center (CCHMC) i2b2 team has extended i2b2 to create an enhanced patient registry and an associated web-based toolkit. It provides the necessary functionality in a modular fashion, allowing users to choose the capabilities that are appropriate for their project. The enhanced registry architecture includes linkage to the EHR and an application layer that allows the development of functionality to support quality improvement and comparative effectiveness research. There are capabilities for data collection to capture information that is not collected in an EHR, as well as mechanisms for reporting and visualization.

Versions of the CCHMC i2b2 code and data documents can be found at the CCHMC SVN: <https://bmi.cchmc.org/svn/i2b2/i2b2/public/>

Example Project: Liver Transplant Registry

Within CCHMC's i2b2 based Liver Transplant Registry users can:

1. **View/Edit EHR data:** Specific EHR fields are identified, mapped to i2b2, and displayed in either a read only, or editable format. Any changes are tracked through an audit trail and users are alerted through a color coding system if a new/different value is available to pull from the EHR.
2. **Perform Data Entry:** Through the use of forms users can add additional data to the i2b2 database.
3. **Run Pre-defined Reports:** Numerous pre-defined reports have been developed for users to run as needed.

View/Edit EHR Data: Patient Information

The screenshot displays the i2b2 Workbench interface for the Liver Registry. The top navigation bar includes the i2b2 Workbench logo, the project name "Cincinnati Children's Research Foundation", and the specific project "Project: Liver QA/Test Environment". A welcome message and a "Logout" link are also present. The main menu includes "Home", "Find Patients", "Chart Review", "Data Entry", "Analysis", "Import/Export", and "Feedback".

The "Data Entry" tab is selected, and the "Add Patient" button is visible. Below this, the "Choose Study:" dropdown is set to "Liver Registry". The "Change Patient" and "Switch to 'View' mode" buttons are also present. The patient information fields are displayed in a table format:

Name:	Alias:	MRN:	i2b2 ID:	DOB:
[Redacted]	[Redacted]	[Redacted]	[Redacted]	[Redacted]

The "Liver Registry" section is titled, and the "Data Last Refreshed: 02/27/2011" and "Patient Last Updated: 03/03/2011, by [Redacted]" information is shown. The "Patient Information" tab is selected, and the "Save" button is visible. The "Patient Demographics" section is expanded, showing the following fields:

Field	Value	Status
MRN	[Redacted]	E
First Name	[Redacted]	E
Middle Name	[Redacted]	E
Last Name	[Redacted]	E
Alias	[Redacted]	E
DOB	[Redacted]	E

The footer of the interface includes the copyright notice "©2003-2010, Cincinnati Children's Hospital Medical Center" and the "CCHMC | i2b2admin" link.

Liver Age at Transplant Report
Last Run on 03/29/2011 15:16:41

Age at Transplant (Last 25 Transplants)

Measure	Calculation
Age at Transplant - Median	3 Years
Age at Transplant - Mean	5 Years
Age at Transplant - Minimum	0 Days
Age at Transplant - Maximum	21 Years
Number of Patients less than or equal to 1 year of age	9
Number of Patients greater than 1 year of age	16
Number of Patients greater than or equal to 18 years of age	1
Percentage of Patients less than or equal to 1 year of age	36.00%
Percentage of Patients greater than 1 year of age	64.00%
Percentage of Patients greater than or equal to 18 years of age	4.00%

Age at Transplant (Patient Specific)

Date of Transplant	Last Name	First Name	MRN	DOB	Ethnicity	Gender
	ABO	Transplant Number	Age at Transplant
