getServices - GetAllProjectUserParam Request Message

```
<message_body>
<pm:get_all_project_user_param id="MYPRIJECT">
<user_name>mikem</user_name>
</pm:get_all_project_user_param>
</message_body>
```

A **GetAllProjectUserParam** message is sent by a client application or another cell service to get a list of all user parameters from a certain project. The domain, username, and password are sent in the header of the message so it does not need to be sent separately in the *<message_body>*.

Role	Access Full	Access Project	Access Self
ADMIN	X	X	X
MANAGER		X	X
USER			X
