getServices - GetCell Request Message

```
<message_body>
<pm:cell_data id="ONT">
<project_path>/</project_path>
</pm:cell_data>
</message_body>
```

A **getCell** message is sent by a client application or another cell service to get a cell in the PM cell.
The domain, username, and password are sent in the header of the message so it does not need to be sent separately in the *<message_body>*.
