# 6.6.4.1 Add User Roles for a Project

Steps to add roles to a user

The following steps outline the process of defining a user's role(s) for a project in the i2b2 Administration Module.
1. In the Navigation panel, expand **Manage Projects** to display a list of projects.

2. Expand the **name of the project** that has the user you want to add a role.
3. Expand the **name of the user** to display a list of options.
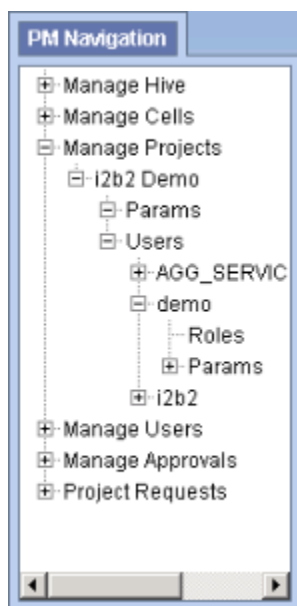

4. Click on the **Roles** option that displays under the user's name.
5. The **Roles Management** page will display on the right side of the window pane.

6. Check of the roles that are appropriate for the user in that project.
7. Click on **Save** to save the changes.
