

11.4.3.2 Project Management Cell Properties

Step 5: PM Cell Properties

In order for the Workplace cell to communication with the PM cell the following properties need to be modified to reflect you environment.

1. In the **workplace.properties** file scroll to the section called **Project Management Cell Integration**.
2. Edit the `workplace.ws.pm.url` property to reflect the location of the PM cell in your environment.

Important

When you edit the `workplace.ws.pm.url` property with the location of your PM Cell it is *extremely important* that you only edit the **hostname** (`/ocalhost`) and the **port** (`9090`). The remainder of the URL is required as it is written and should not be changed.

Project Management Cell Integration

```
workplace.ws.pm.url=http://localhost:9090/i2b2/services/PMService/getServices
workplace.ws.pm.webServiceMethod=REST
# Set this flag to bypass project management cell
workplace.ws.pm.bypass=false
workplace.ws.pm.bypass.project=Demo
workplace.ws.pm.bypass.role=ADMIN
```

3. Save your changes but do not close the file. You will be continuing to edit the file in the next section.
